

Electronic gate to be installed Friday at Two Harbors

FOR THE ISLANDER

A taller electronic gate is scheduled to be installed at the Two Harbors entrance to Catalina's wildlands on Friday, (today) weather permitting, to prevent the Island's deer and iconic bison straying into the campgrounds and other public spaces at Two Harbors.

In case of rain, the installation will be delayed. The electronic gate system will be a duplicate of the Hogsback Gate used to

access the Island's interior from Avalon. The same access cards used at the Hogsback Gate will work at the new Two Harbors gate.

Two Harbors residents with vehicles who do not currently have a road permit from the Catalina Island Conservancy will need to obtain one to enter and exit the interior at Two Harbors.

To obtain a permit, please contact the Conservancy at 310-510-1445.
