Details

Your safety and enjoyment are important to us. We use only open-air, customized eco-tour four-wheel drive jeep vehicles, operated by naturalist guides with four-wheel drive--off-road training.

Due to the intense nature of this experience, all participants must be ambulatory. Guests with chronic neck or back injuries are discouraged from taking this tour.

Note: 2 and 3 hour group tours are only able to accommodate children age 6 and up due to the fact that you may be sharing the jeep with other non-family guests.

Approved booster seats are still required and available due to state law for those younger than 8.

In addition, Private 4hr, 5hr and all day tours , (where a single party buys out the jeep) may be able to take younger children. However due to the educational and historic subject matter of the tour, children younger than pre-school are discouraged from riding. Approved child seats are required and available.

NOTE: Due to the popularity of these tours advanced booking is recommended. There is a \$50. cancellation fee for any tour once booked, so make sure of your dates and times before booking. There is no refund on cancellations withing 48 hours of departing tour, (illness, bereavement and inclement weather cancellations excluded).

Proceeds of all Jeep® Eco-Tours fund the programs and projects of the [Catalina Island Conservancy](#).
